## AudioNetic

The AudioNetic is a wildly usable piece of playground equipment. The interactive and fun experience starts by pumping the foot pedal a few times. Once it's charged with Human Powered Energy, sound will start playing. The AudioNetic can come packed with all kinds of fun and interesting games, or, it can be used as an interactive information point. It could tell the story of a city, company or a piece of art. It can turn any static experience into a dynamic experience! The possibilities go on and on. The button on the AudioNetic is used to switch from language, game or audio file. Inside of the AudioNetic there's a USB stick, volume knob and a switch to play the audio files in alphabetical or random order. The content of the AudioNetic can be changed by simply putting different .mp3 audio files on the USB stick. All our products are entirely Human Powered, this means that there's no need for external electricity or batteries which makes installation of our products very easy.

All Playnetic products are 100% Human Powered. The user generates the energy. There is no need for external electricity or batteries.

All Playnetic products enhance the playing experience through beautiful audio design.

All Playnetic products are weather resistant.

Playnetic products can enrich the playing experience through LED lighting technology.

Playnetic products offer fun, exciting and challenging games through brightly illuminated push buttons or other forms of input.

Several Playnetic products have a removable USB stick with .mp3 audio files. This allows for easy customization and new content.

All Playnetic products use .mp3 coding format. This is a universally used file format for audio. It allows for easy customization and content creation.
