MusicBall

The MusicBall is everyone's favorite playground equipment! The fun starts immediately by spinning the handle to generate Human Powered Energy. This energy is used to fill the playground with beautiful music and stories! Both young and old just can't resist to give the MusicBall a spin. The fun is endless! Playing is a crucial element in the development of children and even adults! Inside of the MusicBall there's a USB stick which holds all the music. Simply pull it out and put a different .mp3 file on it and now your MusicBall has new content! Next to the USB stick there's a volume knob and a switch to play the music in alphabetical order or in a random order. Installation of the MusicBall is a breeze because there are no power cables or batteries needed, it works on Human Powered Energy!

All Playnetic products are 100% Human Powered. The user generates the energy. There is no need for external electricity or batteries.

All Playnetic products enhance the playing experience through beautiful audio design.

All Playnetic products are weather resistant.

Playnetic products can enrich the playing experience through LED lighting technology.

Playnetic products offer fun, exciting and challenging games through brightly illuminated push buttons or other forms of input.

Several Playnetic products have a removable USB stick with .mp3 audio files. This allows for easy customization and new content.

All Playnetic products use .mp3 coding format. This is a universally used file format for audio. It allows for easy customization and content creation.
