KineticClimber

Climb into our Playnetic KineticClimber and play the interactive game with the floating round pushbuttons. An amazing experience for the kids! The KineticClimber is an indispensable piece in our traditional collection. By turning the wheel you generate super sustainable Human Powered Energy. This energy is used for playing the reaction game and playing some cool sounds. If there is enough energy, the game will begin. Climb into the Climber and push the lighting button off. Use your hands, feet or sit on the buttons, it's all possible. Batteries and underground power cables are something from the past. The KineticClimber motion generates all the energy you need. Are you the fastest? Where are you waiting for!

All Playnetic products are 100% Human Powered. The user generates the energy. There is no need for external electricity or batteries.

All Playnetic products enhance the playing experience through beautiful audio design.

All Playnetic products are weather resistant.

Playnetic products can enrich the playing experience through LED lighting technology.

Playnetic products offer fun, exciting and challenging games through brightly illuminated push buttons or other forms of input.

Several Playnetic products have a removable USB stick with .mp3 audio files. This allows for easy customization and new content.

All Playnetic products use .mp3 coding format. This is a universally used file format for audio. It allows for easy customization and content creation.
